

SPORT BOTTLES

2026

THE PERSONALISED BOTTLES SPECIALIST

for over 30 years we have been manufacturing with passion and technical expertise most iconic water bottles you will ever come across to hold in your hand or see on a bicycle, at the gym or in the office.

THE PERFECT BOTTLE CREATED FOR YOU

Do you want to make **corporate water bottles** to promote your brand or for all your staff as Fendi or Bosch did it?

Do you want to create personalised water bottle for your **Sports Team** just like Mapei did it?

Imagine the water bottle for **all students** of your School, such as the university of Catania?

Do you want to distribute **certified** quality water bottles like Decathlon or H&M?

Are you thinking of the official water bottle of **an event**, such as the Dolomite Marathon?

We are an **Italian company** and we chose to produce and work only in Italy.

We can boast an experience of **thirty-year expertise** which allows us to deal with each customer to help finding the best solutions for his project.

We always look at the future, to new forms and solutions, rather than what we have already done, that's why **we invest in research** and we experience each project as a new challenge to win.

Our products wear the Brand and the message of our Customers, every time we give it the care it reserves a unique piece!

INFORMATION ON CUSTOMIZATION

To personalize your bottle we can choose between **screen printing** or **digital printing** technology.

According to your graphic needs we offer you the best technology solution.

Each bottle has its own print size, you can find all the information on each model page downloading the printing area of the item you are interested in from our website

For customization we would prefer to work on **vectorial file**, If it is not possible we can process raster images but they have to be in high resolution.

All dark colored bottles need a white base to print bright colors, this layer must be counted as an extra color unless the white wasn't already part of the graphic.

Screen printing technology doesn't allow to wrap your logo around the bottle completely, please consider a No printable area of 8mm.

Each work is **checked and verified** from our graphics department and send back to customer for final check and approval.

INFORMATION ON MATERIALS

Our products are thought out and designed to be safe, efficient and accessible to everyone.

We choose and use only raw materials which guarantee our water bottles the maximum performances of lightness, elasticity and durability.

All our bottles are **certified for food contact** according to current European regulations and are free of bisphenols (BPA - FREE) Our bottles are **100% recyclable** and disposable through ordinary recovery of plastic

We recommend washing the bottles before the use. It can be done by hand or in dishwasher (max 55°C)

After cleaning, or when the bottle is not used for long periods is advisable leave it open so that can always ventilate.

If you had forgotten for a long time the closed bottle with water or others drinks you may need to wash more carefully. In this case you can also use Amuchina or sodium bicarbonated.

SPORT SERIES

LIGHT, SQUEEZABLE AND RESISTANT

Discover our range of sports bottles.

Available in a variety of sizes and colors to meet all your sports and customization needs.

Made from soft, elastic polymers that provide a perfect “squeeze”.

All our bottles are certified for food contact and **BPA-free**.

100% recyclable.

Ideal sports bottles: lightweight, squeezable, and durable.

Entirely manufactured —from the bottle body to the graphic finish— at our facility in Venegono Inferiore.

100% Made in Italy.

BIOBASED

Special line designed to offer a responsible solution towards the environment.

A conscious thought to offer alternative materials from renewable sources

The green PE used for these bottles is a polyethylene in which the ethylene used is not fossil but **renewable origin**.

The polymer is obtained through processing **sugar cane**, a raw material renewable as it grows over a period of short, tangible and predictable time (cyclicality seasonal). Plastics manufactured from plant origin is define renewable or more technically **biobased**.

It is important to underline biobased raw material are not biodegradable but **recyclable** as normal plastic at the end of its life.

SHAKERS

SUPPLEMENTS, PROTEINS, ENERGY DRINKS

Shine is a shaker with a practical and functional design, perfect for mixing your proteins.

It features an internal grid to hold ice and optimally mix liquids and powders.

The large, translucent glass can hold up to 700cc and is easy to grip thanks to two elegant side grips.

The wide mouth makes it easy to add powders for mixing and allows for optimal washing and drying.

The container's shape offers a large printing area to promote your business and ideas.

Available in 700cc and 500cc sizes.
