ANDRIOLO
BOTTLE YOUR IDEAS

THE PERSONALISED BOTTLES SPECIALISTS

For over 30 years we have been manufacturing customized bottles for leading national and international brands.

We have always done it with passion and technical expertise: lifestyle bottles, for sport or outdoors.

Customizing water bottles with us is very easy, we produce, decorate and assemble them for you.

Do you want to make **corporate water bottles** to promote your brand or for all your staff as Fendi or Bosch did it?

Do you want to create personalised water bottle for your **Sports Team** just like Mapei did it?

Imagine the water bottle for **all students** of your School, such as the university of Catania?

IMMAGINE THE PERFECT BOTTLE FOR YOU

Do you want to distribute **certified** quality water bottles like Decathlon or H&M?

Are you thinking of the official water bottle of **an event**, such as the Dolomite Marathon?

Bring your logo and story to life on a quality product every day, with every sip.

We are an **Italian company** and we chose to produce and work only in Italy.

We can boast an experience of **thirty-year expertise** which allows us to deal with each customer to help finding the best solutions for his project.

We always look at the future, to new forms and solutions, rather than what we have already done, that's why **we invest in research** and we experience each project as a new challenge to win.

Our products wear the Brand and the message of our Customers, every time we give it the care it reserves a unique piece!

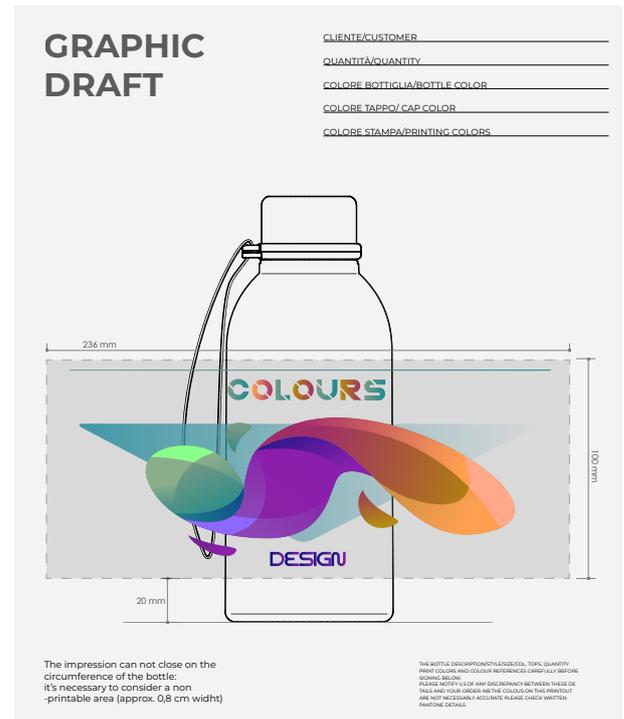

CUSTOMIZATION

To personalize your bottle we can choose between **screen printing** or **digital printing** technology.

According to your graphic needs we offer you the best technology solution.

Each bottle has its own print size, you can find all the information on each model page downloading the printing area of the item you are interested in from our website

For customization we would prefer to work on **vectorial file**, If it is not possible we can process raster images but they have to be in high resolution to ensure an optimal result.

All dark colored bottles need a white base to print bright colors, this layer must be counted as an extra color unless the white wasn't already part of the graphic.

Screen printing technology doesn't allow to wrap your logo around the bottle completely, please consider a No printable area of 8mm in width.

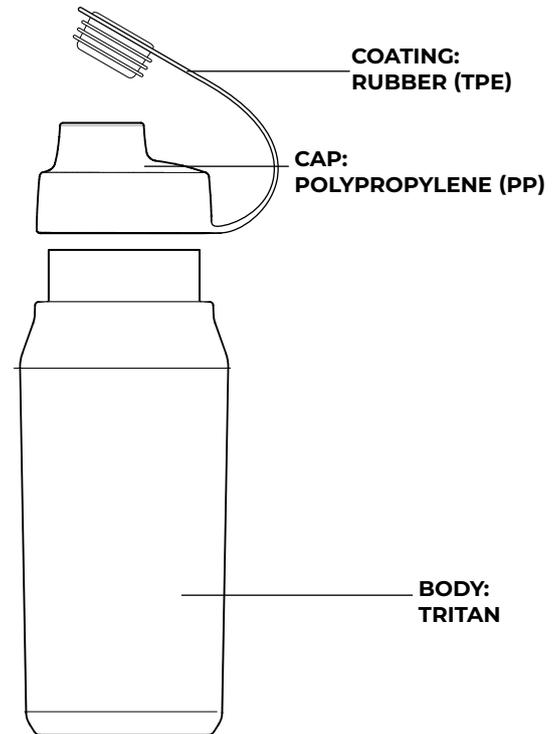

Each work is **checked and verified** from our graphics department and send back to customer for final check and approval

OUR MATERIALS

Our products are thought out and designed to be safe, efficient and accessible to everyone.

We choose and use only raw materials which guarantee our water bottles the maximum performances of lightness, elasticity and durability.

All our bottles are **certified for food contact** according to current European regulations and are free of bisphenols (BPA - FREE) Our bottles are **100% recyclable** and disposable through ordinary recovery of plastic

We recommend washing the bottles before the use. It can be done by hand or in dishwasher.

After cleaning, or when the bottle is not used for long periods is advisable leave it open so that can always ventilate.

If you had forgotten for a long time the closed bottle with water or others drinks you may need to wash more carefully. In this case you can also use Amuchina or sodium bicarbonated.

TRITAN BOTTLES

Wide range of models for every type of requirement.

Beautiful, colourful, safe bottles, in many formats.

The bottle body is made of Tritan, a new generation copolyester polymer free of Bisphenol (BPA-FREE) and **100% recyclable.**

This material allows us to create **light, odorless and unbreakable** bottles.

Perfectly Transparent to check the internal cleanliness at any time

Entirely produced, assembled and customized in our factory in Venegono Inferiore - ITALY

DEVU'

Iconic and original bottle that combines **innovation** and **tradition**.

The only bottle made of polymeric material with a “quick” mechanical cap. This historic closure system

(patented in 1873 in bent iron wire) is today revisited in colored technopolymer.

It is a very practical cap: it always remains attached to the bottle and can be opened and closed with just one hand.

The bottle is rigid, highly-performing, light, unbreakable, odorless, and with perfect transparency.

Also great for storing **carbonated drinks.**

Made of Tritan, a new generation

copolyester polymer, Bisphenol free (BPA-FREE) and 100% recyclable

Exclusively MADE IN ITALY
